

# International Engineer Development Programme

*September 2023 Intake Applications Open*

## Position

We invite applications from naval architects, marine and offshore engineers, civil, geotechnical and electrical engineers, and any other engineering disciplines with an interest in marine to join our International Engineer Development Programme. The programme is currently accredited by RINA and IMarEST, with a similar accreditation by ICE, and we work also with other engineering institutions.

## About the programme

At the end of the programme, participants will be eligible to apply for full membership of RINA, IMarEST, ICE or of other institutions according to their professional discipline, and for registration as Chartered Engineer with the Engineering Council (UK).

- Duration: Four years, typically broken into four placements across the ABL Group including international placements across selected offices worldwide.
- Opportunities in our renewables, maritime and oil & gas sectors
- Offers relevant knowledge and experience in:
  - Design engineering
  - Marine warranty surveying
  - Hydrodynamic and structural analysis
  - Casualty investigation techniques
  - On-site survey attendances
  - Engineering support for claims and litigation
  - Health and safety at work
  - Business administration
  - And many more areas

## What the programme offers you

- Extension of your engineering skills, and application of engineering principles and theory to the solution of real problems
- Experience of engineering in different fields, and in different market sectors
- Enhancement of your flexibility and adaptability to cope with rapid changes in a constantly evolving profession
- Employment with an international team with opportunities to experience work in different offices

## Direct entry

There are also openings for our Direct Entry Engineer Development Programme, where participants will be based at a single office. The number of places on offer will depend upon demand within the local offices. Applicants should advise their preferred choice of office, although no guarantees on vacancies are made.

## Qualifications

### For UK students:

- Applications only accepted from graduates with a Master's degree, accredited by RINA, IMarEST and/or a similar professional institution

### For international students:

- Applicants are required to provide verification that their university course is accredited by RINA, IMarEST and/or a similar professional institution

## About ABL Group

Through targeted acquisition and organic growth, ABL Group has built a comprehensive family of branded energy and marine consultancy companies offering services that are both complementary and interconnected. This allows our business lines, branded service companies, and expertise to focus closely on delivering technical excellence in engineering and consultancy, loss prevention and loss management across 62 offices in 38 countries and over 1000 staff.

## How to apply

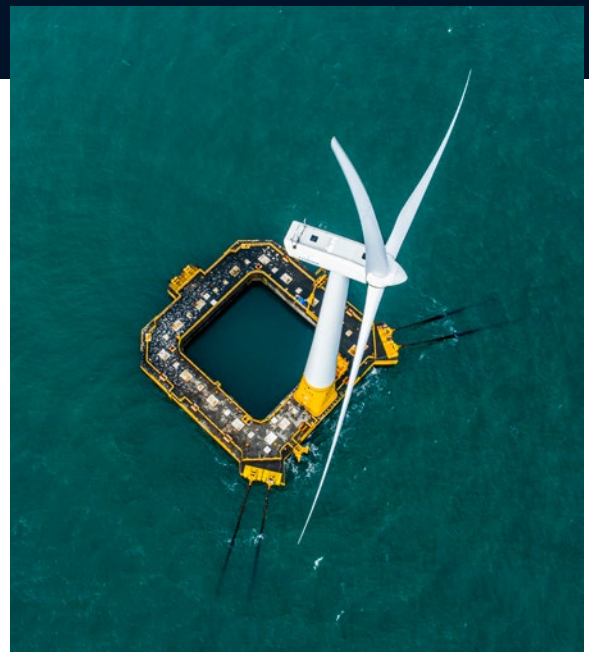

- For full details of the programme and how to apply, please scan the QR code below, or visit [abl-group.pinpointhq.com](http://abl-group.pinpointhq.com)
- Applications open on **21st November 2022**
- Applications close on **31st January 2023**

The covering letter is important to show us why you think the programme is for you, and why you're the engineer for us!

*"The EDP is a fast track to the maritime industry. Having the opportunity to work for the same organisation and yet be exposed to different lines of work, offices and countries is unique to the programme, and, at the same time, an invaluable experience both professionally and personally. In the first four years of my career, I had the chance to: work in the UK and be involved in some very prestigious cases; work onsite for a major marine casualty in Italy; do MWS work in China; and finally, join the maritime team in Singapore which is one of the biggest global hubs."*

**Maria Dragoumerli, EDP Participant 2012 – 2016, now Country Manager of ABL Greece**
